

The geometrical, plain shape
is only a mask for
the advanced technology.
In QUADRAT, **comfort** is what
counts above of all.
The externally modest line
hides a functionality suited to
individual requirements.
It is in the QUADRAT that informal
and ascetic style and serious
technology finally meet.

solid shape
but with surprisingly
gentle manners

the soft, spacious seat
and back cushions
guarantee comfortable sitting

you can fit the arms
perfectly to your needs
thanks to three level adjustment

comfortable conversations

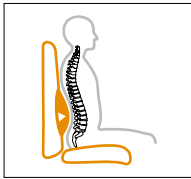

Ergonomic shape of the back

provides ideal back support.

Arms adjustable at 3 levels (3D).

Height adjustability, regulation of rotation and distance of arm pad from back to guarantee natural posture and provide comfortable support for wrists, elbows and arms.

Schukra® system providing for backward-forward adjustability in the lumbar support section to ensure comfort through long working hours.

Construction of seat and back

– plywood frames covered with large-size polyurethane foam to guarantee sitting comfort.

Gas lift allows for smooth seat height adjustability and additional soft shock absorption when sitting down.

Large-diameter 65 mm castors make

the chair move smoothly on any surface. Automatic brakes keep the chair in position when getting up. Choice of soft or hard surface castors.

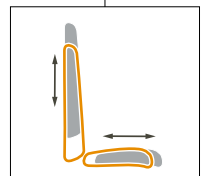

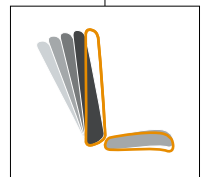

Five-star, extremely durable steel base

guarantees stability and an elegant look for extended periods of use.

Synchronised mechanism to ensure smooth movement and wide range of adjustment options for individual requirements; easy manipulation owing to two handles fitted on both sides of the seat, within easy reach.

Functionality of the mechanism:

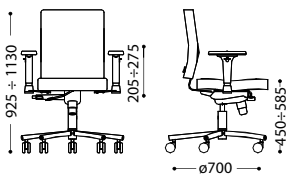

1. **Synchronised back and seat tilt**
– 21 degrees back and 9 degrees seat tilt.
2. **Back block** in one of 5 possible positions.
3. Precise **tilt adjustability**.
4. 10-level **back height adjustability** within 60 mm with the easy to use collapse mechanism.
5. **Adjustable seat depth**, within 50 mm, with 5 positions of block.
6. **Anti-shock mechanism** to prevent sudden impact of the seat against the back when the mechanism is released.
