

CARERA

Konsekwencja wyraża się nie tylko w myślach lecz również w materii.

**Consequence may be expressed not only in thoughts,
but also in matter.**

A line of chairs designed for workstations, conference and waiting rooms. The models with a plywood backrest have an original connection of metal and wooden parts. The decorative cuts in the backrest attract attention. The chairs are characterised by a unique seating comfort which was achieved thanks to a special construction of the upholstered seat. A multi-layer, elastic cover stretched on a metal frame adapts to the user's dynamics of movements. Thanks to this, seating becomes a relaxing activity. In versions wholly upholstered the special construction is also applied in the backrest. The chairs are upholstered in high quality woolen fabrics or leather. Metal parts are either chromium plated (swivel chairs), chromium plated or lacquered (stationary chairs).

Design: Krijn Hamelink

He began his work as a designer in 1969 in a famous design firm Kho Liang le Design Studio. Since 1974 he has been working independently combining design work with educational activities at Rietveld Academy.

„In opposition to chairs whose comfort rests in a thick layer of upholstery, my purpose was to create a comfortable chair whose comfort does not result in thickness of a foam and upholstery but in the whole construction. Springiness results from the shape of the seat. The chair attracts attention by its light form.”

Krijn Hamelink

Carera line of chairs was granted GIO award and the „Product of the Year 2004” distinction.

MPD mechanism 38

1 Regulation of the tilt tension allows to set the backrest tension according to the user's body weight

2 Blocking the chair in several positions allows to adjust the chair position to the user's needs and preferences

3 Anti-shock mechanism prevents the backrest from hitting the user's back after releasing the blockade

4 Ergonomically profiled backrest supports the whole backbone ensuring healthy seating

5 High quality fabrics extremely resistant to abrasion and peeling, all being granted fire-resistance certificate

6 Pneumatic regulation of the seat's height allows to adjust the seat to the user's body size with just one movement of a hand

7 Broad, steel base ensures high quality finishing and exceptional stability of the chair

8 Self-braking castors Thanks to an automatic blockade the chair is not likely to „move away“ when the user stands up

9 Castors for hard and soft surfaces to choose from with no additional surcharge

CARERA 2C

CARERA 3B

CARERA 3C

A chair of an interesting and clear-cut form. Its character is underlined by a backrest with a smooth curvature which is made of flexible plywood. The chair features a special, elastic construction of seat and backrest. The whole structure is accepted by subtle, chromium plated details.

Features:

- complete family of chairs
- elastic construction of seat and backrest that guarantees seating comfort
